PETRO MASTIC

PRODUCT DATA SHEET

Description: Petrolatum based mastic used to fill cavities on irregular surfaces prior to wrapping with Petro Anti Corrosion Tape.

Use: Petro Mastic is a component of the Petro Anti Corrosion System and is used to fill irregularities on metal surfaces prior to wrapping with Petro Anti Corrosion Tape. Flanges, bolts, mechanical joints, valves, and connections are some areas where this product can be used. Filling voids prevents air pockets and therefore inhibits rust. Surface should be primed with Petro Primer before Filler is applied.

Temperature: Withstands temperatures -46 Deg. C. to 70 Deg. C.
-50 Deg. F. to 158 Deg. F.

Colour: Brown

Packaging: 36 Blocks of 17.48 ounces (500 gms)
